AUDITING emphasizes both concepts and standards of independent auditing and integrates contemporary audit methods with a focus on complex judgments and decision processes. The text also brings financial statement assertions into audit procedures. Key accounting issues are brought into each chapter and address: 1) what are the audit implications of the accounting transaction (who the stakeholders are that the auditor has in mind when thinking how to audit a transaction), and 2) what are the legal liabilities,

and, if applicable, ethical implications of the transaction. An integrated audit case is available separately, or can be specially bundled with the text. In addition, detailed audit programs and explanations of audit procedures have been moved to appendices for ease of instructor use.

**Linking Auditing and Meta-Evaluation**- Thomas A. Schwandt 1988-06 The emergence of new evaluation paradigms raises serious questions about how merit can be established and judged. Linking Auditing and Metaevaluation addresses this concern, introducing a strategy by which the quality of inquiry procedures and products can be assured and retrospectively assessed. Based upon the model of fiscal auditing, the technique is applicable to a variety of social scientific investigations and specifically includes non - conventional paradigms such as naturalistic evaluation. Effective regardless of the nature of the inquiry, auditing is also an excellent means of organizing data, thus promoting theorizing and identification of relationships in that data. Each section includes exercises designed both to encoura
